Art Unit: 3764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 23-27, drawn to apparatus, classified in class 482, subclass 121.
- II. Claims 17-22 are, drawn to method of use, classified in class 473, subclass 131.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case The process as claimed may be practiced by any other device which has two elastic cords attached to a handle.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication should be directed to Jerome Donnelly at telephone number (703) 308-2668.
